EXPERIENCE

Software Engineer | Axioned Pvt Ltd (Start-up)   DEC 2019 – PRESENT

CLIENT - Consumers International (Non-Profit Organization)   **WEBSITE LINK**

- **Single-handedly** developed the whole front-end of a website using **React.js and Redux** that is used by **10K+** users to compare countries based on various parameters.
- Developed a **dashboard** in React.js which fetched data from an input file like Excel to display **data visualizations** of various types like **world map**, **polar chart**, customized ranking tables using **Highcharts.js**, **Ag-Grid.js**, React.js, **Redux-Toolkit**, etc.
- Optimized website performances using custom created functions like **debouncing**, throttling, **memoization**, **lazy-loading**, **dynamic imports**, **caching**, reducing superfluous renders etc.

CLIENT - HomeServe - USA

- Developed and enhanced both front-end as well as the back-end of **3** websites using **JAM Stack** and **Eleventy.js** (**Static Site Generator**) used by **4.7M+** users.
- UGI HVAC, Denny's Electric Services and Berkshire Mechanical were the three domains created using Markdown, **Nunjucks**, HTML, CSS, Sass, **JavaScript**, Eleventy.js and **Netlify** (used for **deployment**) from scratch.
- Developed a total of **200+ pages** with proper Search Engine Optimization (**SEO**) technique and best practices to give **optimal performance**.
- Did custom configuration changes to websites by using **webpack**, **Grunt**, **Husky**, etc.

CLIENT - United HealthCare - VSG (Value Story Generator)   **WEBSITE LINK**

- Developed and **enhanced website** by adding features like **categorical bifurcation** of presentations and placemats, download and generation functionality of the presentation.
- This website will simplify the experience of a user in creating a customized **business presentation** or a **placemat story** based on various user preferences.
- Created various **API endpoints** in framework-based web apps by following appropriate coding standards and linting in a GIT tracked environment with the help of **PHP Symfony** framework, **doctrine ORM** (Object Relational Mapper) and **MySQL**.
- Maintained and operated server related activities such as database cleanup, **creating cron jobs**, clearing logs and csv report generation from database, etc.
